Made in Poland. Established 1990.

POL-EKO®
Perfect Environment

PRODUCTS CATALOGUE 2025

POL-EKO® has been present on the Polish market for almost 35 years.

Highest quality equipment and service we provide ensure your satisfaction.

Our wide range of products and professional solutions will suit the most demanding customers.

We remain open to assist in choosing the right product for your needs, as well as to provide you with customized solutions.

We are your partner in lab analysis and technological processes.

Thank you for your confidence.

POL-EKO® Team

POL-EKO® transferred from the past to the future...

2005-2022

SINCE 2023

1990-2005

The letters **P** and **E** are extremely significant for POL-EKO®. These letters are an abbreviation of our name, they are part of our logo and our mission **"Perfect Environment"** which is the extension of them.

At our company, we are dedicated to create a perfect environment not just for our products, but for everyone we interact with. This includes our employees, customers, partners and the local community. We believe that a positive and supportive atmosphere fosters innovation, collaboration and growth.

Furthermore, our equipment is meticulously designed to provide the ideal conditions for storing our clients' samples and facilitating their research. By ensuring optimal environments, we help our clients achieve accurate and reliable results in their scientific endeavours.

Through our commitment to excellence, we create the Perfect Environment.

QUALITY POLICY

The company is committed to maintain the highest standard of quality, encompassing not only products but also actions in the context of the global community and the natural environment. We make every effort to ensure that our products are innovative and state-of-the-art. We create an excellent working environment for our employees and in the equipment we produce, we provide ideal conditions for storing, researching and incubating our clients' materials. Every day, our partners and clients can rely on our help and support. We express this commitment in our Mission, which states:

We create the perfect environment

We believe that fulfilling this declaration and our set goals will aid us in our continued growth.

The vision of our company is contained in the six letters forming our name. The expansion of these letters defines the philosophy of POL-EKO. This is how we want to be perceived, this is what we strive for and this is our goal.

P	PRACODAWCA EMPLOYER	Respected in the region as **an employer**, valuing human rights in all areas of its operations, providing opportunities for the professional development of its employees, and fostering a friendly atmosphere in the workplace. Committed to taking decisive actions against all forms of discrimination and intolerance.
O	OSOBOWOŚĆ PERSONALITY	A company enjoying **the reputation** of a competitive firm in global markets, solid in its customer relationships, unafraid of new challenges and financially stable.
L	LUDZIE PEOPLE	A team of excellent **professionals** driving innovation in products and processes and nurturing excellent relationships with customers and business partners.
E	EKOLOGIA ECOLOGY	An actively engaged company in **pro-environmental** activities, promoting energy efficiency, supporting the development of environmentally friendly technologies, recognizing the value of water as a limited natural resource and committed to actions aimed at reducing waste.
K	KREATYWNOŚĆ CREATIVITY	A leader in **creating** new technologies, products and services that transform the industry, tailored to the specific needs of each customer.
O	ODPOWIEDZIALNOŚĆ RESPONSIBILITY	An engineering company taking **responsibility** for its solutions and products, offering professional post-sales service.

Through continuous improvement of processes and the Quality Management System, employee education, collaboration with business partners and ensuring adequate resources, the management and owners of POL-EKO commit to implementing this quality policy and sustainable development policy. Our goal is not only to achieve business success but also to create a positive impact on the world and the environment in which we live.

EMPLOYER TOLERANCE

At POL-EKO®, we believe that diversity and equality are the foundations of our success. As an employer, we are committed to treating all our employees equally, regardless of gender, belief, religion, nationality, skin color, sexual orientation and disability.

Working with POL-EKO® means more than just accessing high-quality products and maintaining a professional employer-employee relationship. We feel a deep sense of responsibility towards society, especially within our workplace and the communities where we operate.

POL-EKO® is a place where everyone can feel accepted and valued. We create a supportive atmosphere that promotes personal and professional growth, ensuring that everyone has an equal opportunity to succeed. We are proud to be a model of tolerance and inclusivity in the business world.

1 Accredited Measurement Laboratory POL-EKO LAB

PERSONALITY POLAND

We are very proud to be Polish company. We have been appreciated in our country for years - we are honored by the recognition our efforts from industry representatives, city and district authorities and external institutions. In 2023, POL-EKO® was awarded the FORBES DIAMONDS 2023 by Forbes magazine, celebrating our positive credibility rating. Additionally, we have been honored three times with the prestigious District Entrepreneurship Leader Award, recognizing our innovation, economic growth and active participation in the local community.

Our collaboration with the District Continuing Education Center earned us a distinction from the Ministry of National Education, naming us a Talent Discovery Place by the Education Development in Warsaw. We have also proudly received multiple medals at the EuroLab exhibitions.

These awards are a testament to the trust placed in our brand and serve as powerful motivators for our continued efforts. At POL-EKO®, we see these recognitions as a reflection of our commitment to excellence and as an encouragement to keep striving for even greater achievements.

PEOPLE TEAM

Our greatest strength and source of inspiration are our people. Our employees form a talented team brimming with ideas and energy, ready to tackle any challenge. We are proud to have earned the trust of our employees, customers and distributors from over 90 countries around the world.

These global partners help to promote the value of the Polish manufacturing market by delivering our products and services all over the world. In return, we show them respect, support and appreciation.

POL-EKO® is more than just a company; it is a community built on the values of teamwork, mutual respect and shared success.

WODZISŁAW ŚLĄSKI 2024

ECOLOGY
SUSTAINABILITY

As a family-owned company, making sustainable, long-term decisions is our second nature. We are deeply committed to environmental protection and energy efficiency and this commitment is evident in our actions and implementations. Our energy-efficient and climate-friendly laboratory equipment plays a significant role in building the Green Laboratory. Compared to traditional compressor technology, we achieve lower energy consumption with maximum environmental benefits by utilizing Peltier elements in our incubators and climate chambers. Key sustainability initiatives at POL-EKO® include:

- **Eco-friendly Refrigerants**: we use low Global Warming Potential (GWP) refrigerants to minimize environmental impact,
- **Recyclable Materials**: most materials used for our production are recyclable,
- **Sustainable Packaging**: we use wooden pallets and cardboard packaging elements that carry FSC Certification,
- **REACH/RoHS Compliance**: all our products meet the REACH and RoHS regulations,
- **Renewable Energy**: electricity for production we obtain from photovoltaic panels mounted on the assembly hall roofs,
- **Heat Recovery**: we recover production heat for heating purposes, optimizing energy use,
- **Heat Pumps**: we use heat pumps for heating our buildings efficiently,
- **Wastewater Treatment**: we have our wastewater treatment plant to ensure responsible water management,

At POL-EKO®, sustainability is not just a goal but a fundamental aspect of our operations. Our commitment to eco-friendly practices and energy efficiency reflects dedication to preserving the environment for future generations. We believe that by integrating these principles into our daily operations, we can make a significant positive impact on the world around us.

RESPONSIBILITY
QUALITY

We enjoy tradition and modernity in one. Professionalism, functionality, comfort and aesthetics are values that the modern market and the customer value and that we have been building for over 30 years. Tradition is our strength, experience our ally, development our future.

One of our goals is to take care of the quality of the products we offer. All our products are subjected to absolute quality control. We have implemented a Quality Management System that meets the requirements of the ISO 9001:2015 standard.

Setting quality requirements and consistently meeting them is not only a conscious responsibility for the product and customer satisfaction in the pre- and post-sale lifecycle of the product but also savings in the production process as well as brand development and building its reputation which benefits everyone.

CREATIVITY
INNOVATIVE

We play a leading role in the ever-growing laboratory equipment industry, consistently delivering state-of-the-art products to meet the unique needs of our customers. Our creativity is driven by an insatiable curiosity and a positive, enthusiastic approach.

Our goal is to continue evolving as a company, expanding into new markets, and attracting new customers. We understand that creativity is synonymous with development, and development is the key to securing a prosperous future. We are committed to innovation, ensuring that our solutions are not only effective but also forward-thinking.

As we look to the future, we remain focused on our mission to "create Perfect Environment" now and in the future.

SMART WINDOW OPTION

The modern refrigerator with glass doors, equipped with advanced Smart Window technology are perfect for medical facilities. Thanks to this technology, your products will be safe and well-visible whenever you need them.

- The Smart Window doors change their transparency according to your needs. With just the press of a button, the glass can become transparent or non-transparent.
- When turned off, the Smart Window glass provides full privacy, ideal for storing medications and medical materials that should not be visible.
- Smart Window is a laminated glass, meeting the highest safety standards (EN 14449), ensuring durability and resistance to damage.
- Even in the transparent state, Smart Window glass offers a light fogging effect, minimizing light reflections and creating an aesthetically pleasing finish.
- Low energy consumption and a long lifespan (over 3 million on/off cycles) make this technology environmentally friendly and economical to use.

ST2 P SMART with SMART WINDOW OPTION

ST2 P SMART with SMART WINDOW OPTION

APPLICATIONS IN MEDICAL FACILITIES

- **Clinics:** Efficient organization and storage of medications and medical materials with the ability to instantly check the refrigerator's contents.
- **Hospitals:** Secure storage of medications and laboratory materials with the option for quick visual access without opening the doors.
- **Pharmacies:** Elegant presentation of medications and supplements, while ensuring privacy and security of stored products.

By choosing cooled incubator (ST) or laboratory refrigerator (CHL) with Smart Window technology, you invest in unparalleled quality, innovation and functionality.

COOLED INCUBATOR STP 4 WITH PELTIER COOLING-HEATING SYSTEM

The STP 4 Peltier-Cooled Incubator from POL-EKO® is designed for precise and efficient temperature control, using an eco-friendly Peltier cooling-heating system. This system eliminates the need for compressors and refrigerants, reducing both environmental impact and operational noise. Ideal for labs prioritizing quiet and vibration-free equipment, the STP 4 ensures stable temperature conditions with excellent temperature variation and fast recovery after door openings.

STP4 PS SMART

STP4 PS SMART

MAIN STANDARD **BENEFITS**

- temperature range: +3°C to +70°C (up to 15°C below ambient)
- capacity: 250 liters
- user interface: SMART or SMART PRO full-color touch screen
- construction: durable stainless steel with easy-to-clean polished finish or powder coated sheet
- energy efficiency: low power consumption due to the Peltier technology, optimal for prolonged use in laboratory environments
- adjustable shelving: customizable shelf positions for flexible storage

This model is ideal for applications requiring controlled temperature without the disadvantages of traditional compressor systems, providing reliability, efficiency, and ease of use for modern laboratories.

* depending on the model

Refrigerators and ST cooled incubators CHL/ST 500, 700, 1200, 1450 (except models with FIT/FOT option) are equipped with M- monoblock cooling system. It provides more space in the upper part of the chamber and eliminates condensate tray on the unit's back. Automatic defrosting function is supplied in standard. They are "no frost" units.
Letter "M" appears in the model name eg. ST 500 CM SMART (C-comfort, M-monoblock).

UNITS **WITH PHOTOPERIOD**

Most areas on Earth, apart from around the equator, are characterised by varying lengths of day and night which has a bearing on how organisms respond to changing amounts of light. There is, for example, a close relationship between the flowering of certain plants, the development of microorganisms and the length of day and night. This phenomenon is called photoperiod. Thanks to our units with the photoperiod option (only available for ST cooled incubators and IL cooled incubators in the SMART version), it is possible to simulate day and night. The basic difference between the FOT and FIT functions is that in the first case, the light can only be turned on and off in the program, and in the second, you can additionally control its intensity.

MAIN STANDARD **BENEFITS**

- for each segment it is possible to program temperature, duration time, fan and light efficiency (ON / OFF)
- temperature range with light OFF: +3°C... +50°C and -10°C... +50°C (for IL with ILW/T option)
- temperature range with light ON: +10°C...+50°C
- 4000K neutral white LED lighting installed in side walls or ceiling in ST cooled incubators; in door or ceiling in ILW cooled incubators
- with FOT option the equipment operates with time priority (see page 125)
- automatic defrosting function

PHOTOPERIOD (FOT) OPTION

adjustable illumination intensity	no											

* only version of ST cooled incubators with compressor cooling system (with FOT option, monoblock (M) units are not used)

UNITS WITH **PHYTOTRON**

Units with phytotron allow precise control of temperature, humidity (in the case of climatic chambers) and lighting, enabling the simulation of an entire day-night cycle with distinct times of the day such as dawn, midday, evening and night. This is achieved by adjusting the duration and intensity of light, creating optimal environmental conditions. These devices are used in studies on plant growth and development and find broad applications in the pharmaceutical, food, cosmetic and electronics industries, as well as many other fields where maintaining stable and repeatable testing conditions is crucial.

Available with lighting and humidity:

- KK climatic chambers
- KKP constant climatic chambers
- KKS 500/700/1200/1450

Available with lighting:

- ST 500/700/1200/1450 cooled incubators (ST) in SMART PRO version*
- ILW 115/240/400/750 cooled incubators in (ILW) SMART PRO version

* with the FIT version, we use only ST cooled incubators with a compressor cooling system - C, CS, P, PS versions. Units with a monoblock cooling system (CM, CMS, PM, PMS versions) are not applied here.

KK 350 SMART PRO FIT DS LED MULTI

MAIN STANDARD **BENEFITS**

- for each segment, it is possible to program the temperature, time, fan efficiency level and lighting intensity (every 1%). Additionally, in the case of climatic chambers (KK, KKP), the humidity can also be programmed
- chamber with FIT option can operate with priority of time or parameters (temperature or temperature and humidity)
- automatic defrosting function
- thanks to forced air convection, the variation and fluctuation of temperature and humidity are very low

* KKS 500/700/1200/1450

LIGHT SOURCE

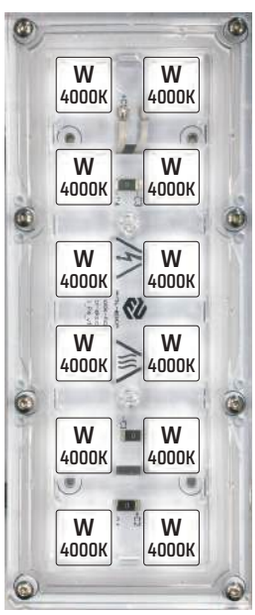
Phytotron chambers are equipped with advanced LED modules, offering users the flexibility to customize light color and intensity for each program segment. These modules can be combined, for example, far-red with blue, to create tailored lighting conditions. Adjustable dimming further ensures precise intensity control to meet the unique requirements of each sample.

The LED modules are designed for long-term reliability, while their innovative optics deliver uniform light distribution across all types of loads. Additionally, the low-heat emission of LED technology helps maintain precise temperature control within the chamber, ensuring optimal performance for your research and tests.

AVAILABLE **LED MODULES**

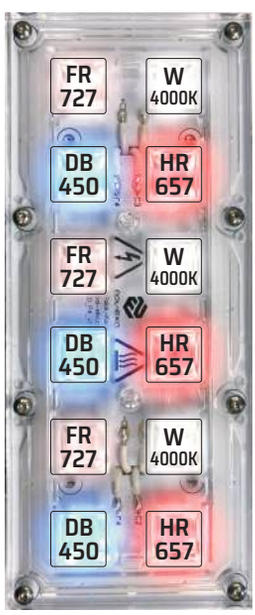
There are two standard LED modules: white (WHITE) and colored (MULTI) - 4 colors (far red, deep blue, white and hyper red) and additional custom LED module. The colors of the CUSTOM LED module and their wavelengths in the phytotron units can be tailored to the individual needs of the customer. It is important to note that the maximum number of custom colors that can be used in these units is four. Thanks to such solutions, our phytotron devices meet even the most demanding requirements of our customers.

FIT LED WHITE



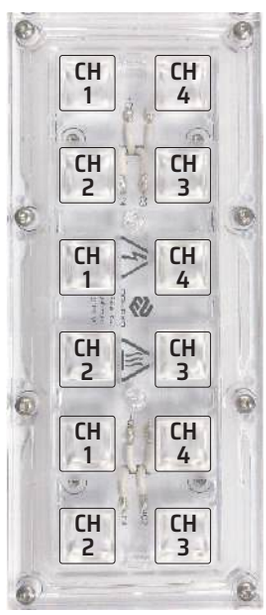
W 4000K — White (colour temperature 4000K)

FIT LED MULTI



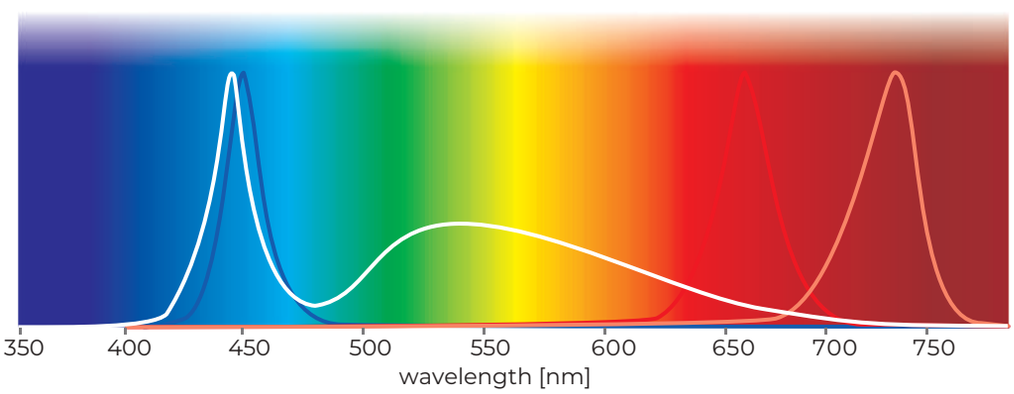
W 4000K — White (colour temperature 4000K)
HR 657 — Hyper red (wavelength 657 nm)
FR 727 — Far red (wavelength 727 nm)
DB 450 — Deep blue (wavelength 450 nm)

FIT LED CUSTOM



CH 1 / CH 2 / CH 3 / CH 4 — All four channels as custom colours.

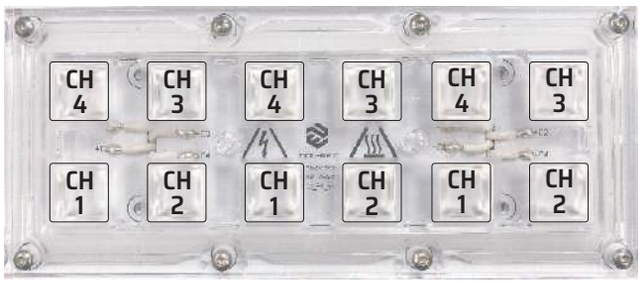
Detailed configuration see page 21.



- far red LED (727 nm)
- hyper red LED (657 nm)
- deep blue LED (450 nm)
- white LED (4000 K)

CUSTOM LED MODULE CONFIGURATIONS

FIT LED CUSTOM



NON-STANDARD COLOURS CONFIGURATIONS

1 COLOUR		2 COLOURS		3 COLOURS		4 COLOURS	
CH 1	colour 1	CH 1	colour 1	CH 1	colour 1	CH 1	colour 1
CH 2	colour 1	CH 2	colour 2	CH 2	colour 2	CH 2	colour 2

CH 4	colour 1	CH 4	colour 2	CH 4	blank	CH 4	colour 4

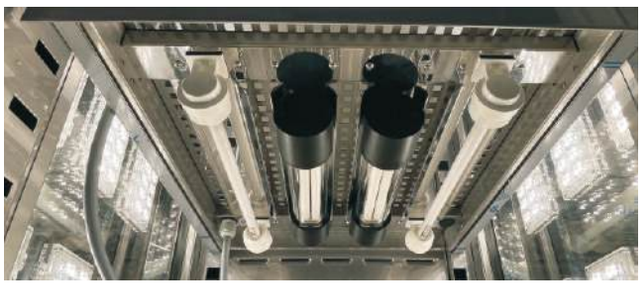
ADDITIONAL LIGHT SOURCE (OPTIONAL)

In the phytotron units, there is also the option to use UV-A, UV-B and UV-C fluorescent lamps.

The UV lamp(s) can be mounted:

- in the ceiling of the working chamber
- as an over-shelf lighting panels

also combinated with FIT LED modules.



Example of UV-A and UV-B lamps mounted as an over-shelf panel KK 500 SMART PRO with FIT S 500 LED WH and FIT P 500 UVA+UVB

LED LIGHT TUBES

LED tubes as an alternative to LED modules are available only in phytotron units with light sources placed:

- in the side walls (FIT S)
- in the side walls and doors (FIT DS)
- in the doors (FIT D)

Temperature control range with lighting: from +10°C to +45°C.

KK 350 SMART PRO FIT DS with LED tubes

CHOOSING THE RIGHT LIGHT PLACEMENT

The light sources, depending on the choice of unit, can be mounted in the side walls (FIT S LED), door (FIT D LED), in the walls and door (FIT DS LED) or as the over-shelf panels (FIT P LED/PANEL LED):

LIGHT IN SIDE WALLS FIT S LED

LIGHT IN DOOR FIT D

LIGHT IN SIDE WALLS AND DOOR FIT DS

OVERSHELF PANEL FIT P

FIT OVER-SHELF PANELS IN CHAMBER

LED over-shelf panels with adjustable intensity can be equipped with several independently controlled light colors.

Depending on the model, 1 to 3 lighting panels can be placed in the chamber. The FIT P LED version includes 1 over-shelf panel and sockets to allow installation of extra panels if required (to be ordered separately).

The FIT/R3 option allows to control the light intensity separately for each panel.

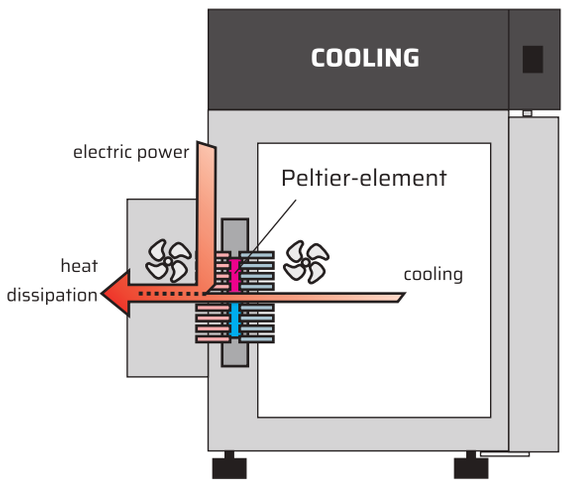
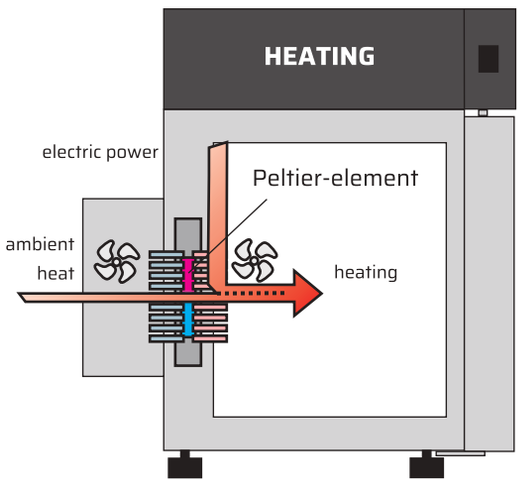
PELTIER COOLING-HEATING **SYSTEM**

Peltier technology allows for a stable and precise temperature inside the incubator, which is crucial to the success of the incubation process. With this solution, users can maintain optimal conditions for research. Peltier-cooled incubators and climatic chambers are solution that stands out from traditional models. Efficient cooling, energy savings, intuitive operation make these products popular around the world.

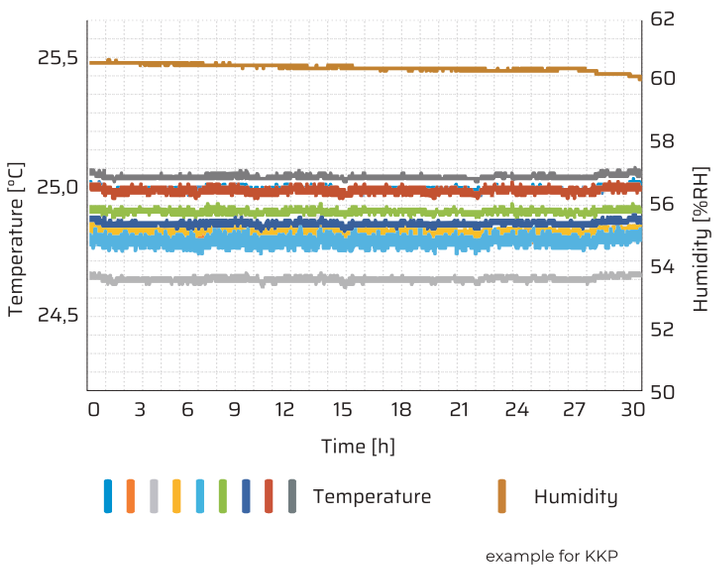
Peltier technology are applied in ILP cooled incubators (page 57), STP cooled incubators (page 15) and KKP climatic chambers (page 107).





MAIN STANDARD **BENEFITS**

Excellent performance - boosted with Peltier element heating-cooling system



example for KKP

Lighter and smaller

The cooling system based on Peltier modules allows reducing dimensions and weight of the unit (compared to compressor-cooled chambers).

No vibration and more quiet operation

Compared to compressor-cooled units, Peltier units do not vibrate, and the noise level is significantly lower.

Environmentally friendly

The elimination of compressor, and thus refrigerants, ensures a reduced environmental impact, including the prevention of ozone layer depletion and global warming.

Energy saving

The tests performed at a temperature close to ambient temperature show impressive savings. The energy cost is reduced on average by 40% compared to compressor-cooled chambers.

Perfect performance

The cooling system based on Peltier elements features excellent temperature variation and fluctuation. The humidity inside the chamber is extremely stable.

LABDESK SOFTWARE

LabDesk advanced laboratory management software for POL-EKO® SMART and SMART PRO Units

Elevate your laboratory management with LabDesk, the comprehensive software solution designed for seamless control and monitoring of POL-EKO® SMART and SMART PRO units.

Powerful connectivity:
- direct ethernet network integration
- simultaneous connection of multiple SMART PRO units
- complete remote management capabilities

Comprehensive monitoring features:
- real-time temperature, CO_2 and humidity monitoring
- detailed program status tracking
- instant alarm notifications
- comprehensive data logging

Advanced data management:
- easy data download and event tracking
- automatic report generation
- professional chart creation
- intuitive remote control interface

Whether you're managing research, scientific or industrial environments, LabDesk provides unparalleled control and insight into your laboratory equipment. Stay informed, connected and in control with just a few clicks.

Experience the future of laboratory management with LabDesk – where technology meets scientific excellence.

MAIN FEATURES

SMART	SMART PRO	
X		dongle required
	X	control unit remotely

	X	edit users

LABDESK **CLOUD PLATFORM & APPLICATION**

LabDesk Cloud - your laboratory management cloud solution at your fingertips

Introducing LabDesk Cloud, the cutting-edge platform designed to revolutionize laboratory management for SMART and SMART PRO units. Our innovative cloud software brings unprecedented flexibility and convenience to your scientific workflow.

- access your laboratory data anytime, anywhere
- view status and measurements on smartphones, tablets, laptops, and PCs
- simple sign-in process for your SMART and SMART PRO units
- stay connected to your lab's critical information 24/7

New application for youe smartphone, download the LabDesk Cloud mobile application now available on:

- Apple App Store
- Google Play Store

Stay connected, stay informed.
LabDesk Cloud puts your laboratory data in the palm of your hand.

"A modern approach to data is to store in the cloud and use advanced technologies to process it as we need it."

Lab Desk

LABDESK CLOUD **FEATURES**

- simultaneous connection of several SMART and/or SMART PRO units
- current measured values preview in the form of a table and chart
- unit status preview with events history and data export possibility

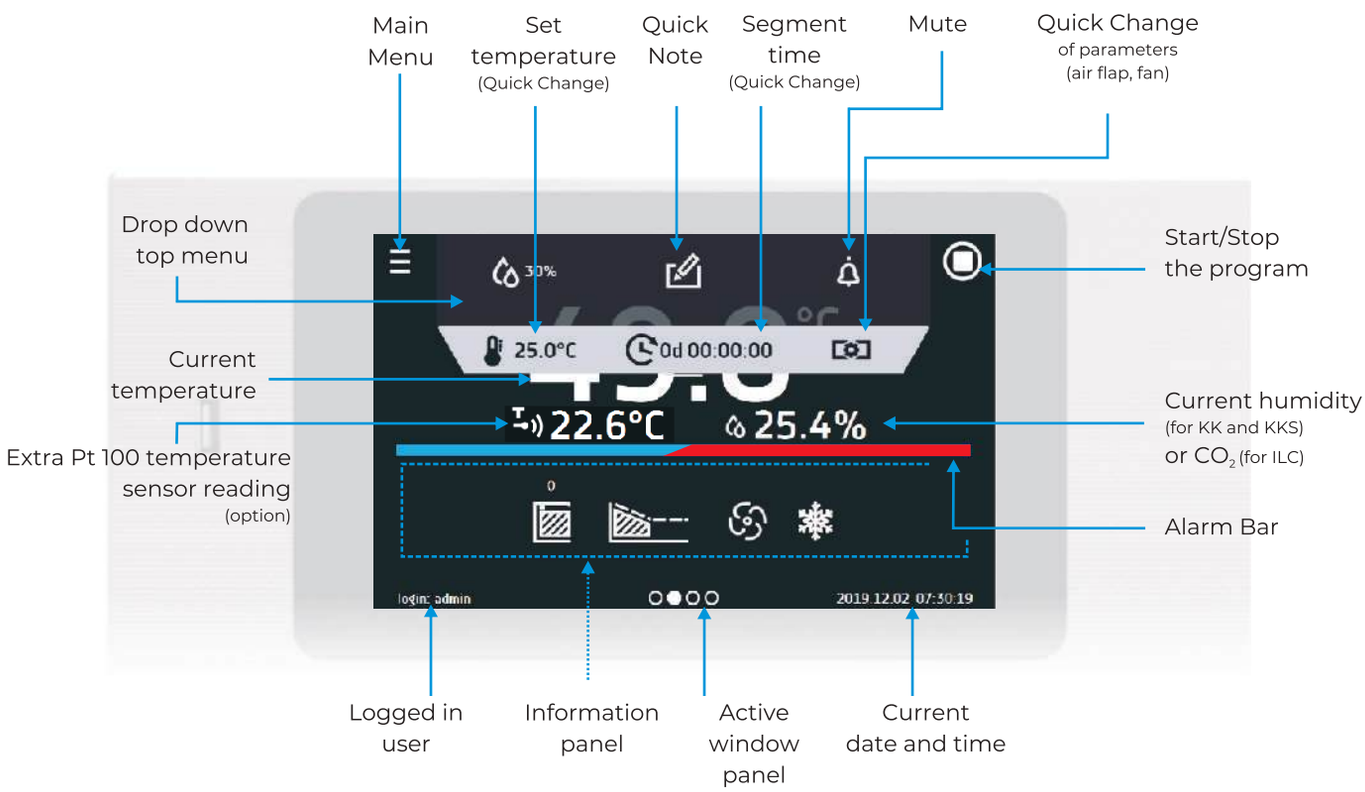
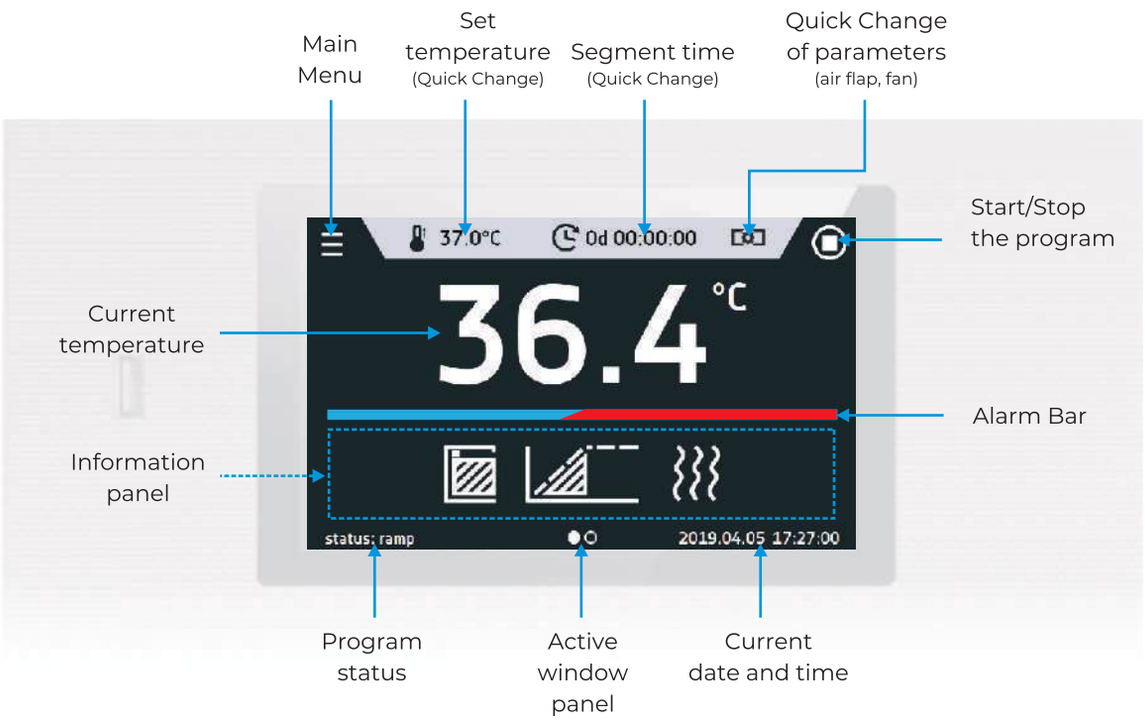
SMART PRO - ADVANCED CONTROLLER
7" COLOUR TOUCH PANEL GUARANTEES INTUITIVE AND COMFORTABLE OPERATION



ADVANTAGES OF THE **SMART PRO** CONTROLLER

- large (7”), clear, full-colour touch screen
- LAN, USB ports, Wi-Fi for communication and data transfer
- multi-segment time and temperature programs
- overview of data in tabular and graphic form
- visual and audible alarm
- administration functions for easy management
- password protected log-in
- internal memory for programs and data storage
- operating with gloves on
- event registry with user notifications
- LabDesk software and instruction manual for direct download
- Alarm Bar – instant visual information about chamber status
- Quick Note – user can save text notes (50 characters) in Smart PRO controller memory
- Quick Change of parameters: temperature, humidity, time, air flap and fan (according to model)

SMART - STANDARD CONTROLLER
4.3" COLOUR TOUCH PANEL



Touch screens of the
SMART and SMART PRO controllers
can be operated with latex gloves!

ADVANTAGES OF THE **SMART** CONTROLLER

- 4,3” clear, full-colour touch screen
- USB and LAN ports for data download
- multi-segment time and temperature programs
- internal memory for programs and data storage
- operating with gloves on
- event registry
- visual and audible alarm
- instruction manual for direct download
- Quick Change of program parameters: temperature, time, fan, air flap (according to model)
- Alarm Bar - instant visual information about chamber status

SMART VS SMART PRO **COMPARISON**

controller	SMART	SMART PRO
display	4.3" touch screen	7" touch screen
network	LAN	LAN and Wi-Fi
USB	YES saving registration data saving events	YES saving registration data saving events uploading programs
keypad	Numeric	Alphanumeric
languages	PL, EN, RU, CZ, IT, PT, UA, FR, ES	PL, EN, RU, CZ, IT, PT, UA, FR, ES
main screen	Dashboard (all relevant data visible from one main window)	Dashboard (all relevant data visible from one main window)
users	-	5
users account types	-	User / Admin / Super Admin
programs	5	40
program name	Free number assigned	User editable
priority	Parameters	Parameters, time
segments	6	100
light control	Only ON/OFF (FOT)	YES (FIT)
schedule	-	10 schedules
data registry	max. 10,000 measurement data stored for a maximum of 6 months	max. 10,000 measurement data stored for a maximum of 12 months
events registry	YES	YES
statistics	YES - only the current cycle	YES - from every segment and program cycle
temp. protection class	1.0 or 2.0 (3.1, 3.2, 3.3 - option)	3.1 or 3.2 or 3.3
Quick Note	-	Ability to enter user text notes
graph	-	YES
mail notifications	-	Alarm notifications
unit name	Fixed (serial number)	Editable
Alarm Bar	YES	YES
Quick Change	YES	YES
software for PC	LabDesk (option)	LabDesk

SMART AND SMART PRO FEATURES COMPARISON

SMART	SMART PRO	
	X	large (7"), full colour touch screen
X		4.3", full colour touch screen
X	X	energy-saving screen mode
	X	alphanumeric keypad
X		numeric keypad
X		communication and data transfer via: LAN and USB
	X	communication and data transfer via: LAN, USB, Wi-Fi
X	X	saving measurement data on external memory via USB port
X		multi-segment time-temperature profile (up to 6 segments)
	X	multi-segment time-temperature profile (up to 100 segments)
X		light time control (FOT)
	X	control of lighting duration and intensity (FIT)
	X	displaying data as a graph or table
X	X	visual and audible alarm
	X	Administrator function to manage User accounts
	X	login secured with a password or pattern (Smart Lock)
X	X	internal memory for measurement data and programs
X		5 programs
	X	40 programs
X		max. 10 000 data records stored for a maximum of 6 months
	X	max. 10 000 data records stored for a maximum of 12 months
X	X	unit name – serial number
	X	unit name – editable
X	X	ability to operate the screen with latex gloves
X	X	event log
	X	event log with user message support
X	X	user manual to download from the unit's internal memory
	X	LabDesk software available in the unit's internal memory
X		LabDesk software – option
X	X	Alarm Bar – quick visualization of unit status
	X	Quick Note – User can write and save message in unit's internal memory
X	X	Quick Change – quick change of parameters: temperature, humidity, time, air flap opening, fan efficiency
X	X	Quick Program – quick launch of the program from the main screen
X	X	Mute – temporarily turns off sound signals
	X	automatic logout
X	X	automatic screen lock
X	X	unit automatic self-diagnosis
X	X	malfunctions displayed as error codes (explanations of error codes: smart4lab.eu)
	X	reports sent by e-mail
X	X	cyclical program repetition (up to 255 cycles or indefinitely)
X	X	program start delay
	X	schedules (max 10)
X	X	working time adjustment (1 min to 365 days or continuous operation)
X	X	setting up the ramp
X	X	preview of set and current parameters while the program is running
X	X	registration average, min. and max. temperature values for each segment and cycle
X	X	temperature/humidity calibration by the user
X	X	operating mode with time or parameter priority
X	X	temperature sensor damage alarm
X	X	alarm of exceeded set parameters
X	X	open door alarm
X	X	open door alarm delay
X	X	open door counter
X	X	power outage alarm
X	X	continuation of the program after turning on the power
X	X	real time clock
X	X	time zone selection
	X	Ethernet output for data and event register, programming and unit operation control
X		Ethernet output for data and event register

LABORATORY REFRIGERATORS

are equipped with a cooling system
and can provide a stable temperature
between 0°C ... +15°C

SMART/SMART PRO controller with USB port

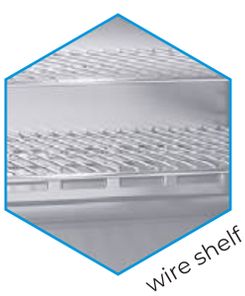
access port (Ø30 mm)

Laboratory refrigerator CHL 2 P SMART PRO

door lock and door lock sensor with alarm

glass door (option)

internal LED lighting, temperature sensors and fan



wire shelf

ACCREDITED ISO/IEC 17025 CALIBRATION

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

MAIN STANDARD **BENEFITS**

- temperature range: 0...+15°C
- quality control protocol (at +4°C)
- English instruction manual
- temperature protection class 1.0 to DIN 12880
- open door alarm
- castors for CHL 1200 and 1450
- LAN and USB ports
- internal LED lighting
- height adjustable feet for CHL 1, 2, 3, 4, 5, 6, 500, 700
- access port (Ø30 mm) with silicone plug on the left wall
- door lock
- stainless steel wire shelves (INOX)
- solid door
- main power switch flush with housing prevents unintentional switch off
- anchoring kit for CHL 500, 700, 1200, 1450 and double/triple chamber units
- automatic defrosting function for CHL 500, 700, 1200, 1450

EXTRA FOR **SMART PRO**

- Wi-Fi
- LAN cable
- LabDesk
- fan speed control in the range 50...100% for CHL 1-6
- temperature protection class 3.2 to DIN 12880

AVAILABLE **VERSIONS**

- SMART
- SMART PRO
- TR tropic (on request) for higher ambient temperatures
- double/triple chamber units
- combined with ZLN 85 or ST

SOFTWARE

- LabDesk for data download to a PC via LAN or Wi-Fi (optional for SMART version)
- LabDesk Cloud platform for remote data monitoring

scan me

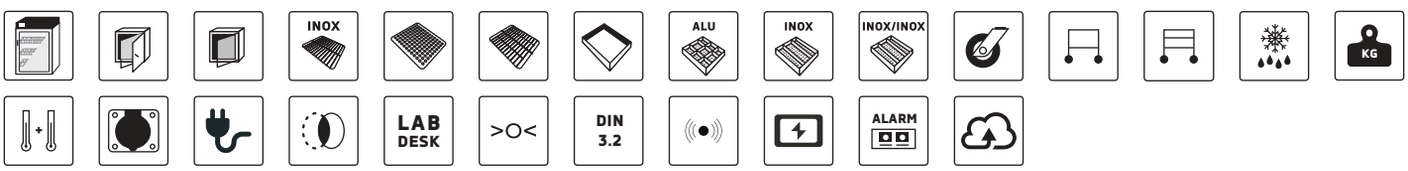
all the above technical data refer to standard units (without optional accessories)
1 - additional internal glass door
2 - on uniformly loaded surface
3 - reinforced shelf
4 - for units with solid door, in version C (comfort)
5 - fluctuation measured in centre of chamber; in space, variation (K) calculated for chamber as: K= +/- (T avg max - T avg min) / 2
for CHL 2-6 parameters given for the chamber above the bottom step
6 - two columns with 3 shelves each

OPTIONS & **ACCESSORIES** (icon description see pages 117-124)



DIMENSIONS & DATA

All dimensions refer to standard units
(without optional accessories).

Overall depth doesn't include 50 mm of power cable, the width does not include the 20 mm of access port's silicone plug.

The internal depth of units with double door is smaller.

Possibility of changing the shelf position:
- CHL 1-6 every 25 mm
- CHL 500-1450 every 56 mm

castors with brake

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- temperature range: -25...0°C for ZLN 85 and -40...0°C for ZL-T 125, 200, 300
- quality control protocol (at -20°C)
- English instruction manual
- open door alarm
- castors (except ZLN 85)
- LAN and USB ports
- height adjustable feet for ZLN 85
- access port (Ø20 mm) with silicone plug on the left wall
- door lock
- stainless steel wire shelves (INOX) for ZLN 85
- stainless steel shelves (INOX) with hole for ZLN-T 125, 200, 300
- perforated stainless steel shelves (INOX) for ZLW-T 200, 300
- solid door
- main power switch flush with housing prevents unintentional switch off

AVAILABLE **VERSIONS**

- SMART
- SMART PRO
- with natural air convection
- with forced air convection
- reinforced
- ZLN 85 combined with ST/CHL 2 or 3

SOFTWARE

- LabDesk for data download to a PC via LAN or Wi-Fi (optional for SMART version)
- LabDesk Cloud platform for remote data monitoring

EXTRA FOR **SMART PRO**

OPTIONS FOR ULTRA-LOW FREEZERS

ZLN-UT 500 VIP P SMART

ZLN-UT/ST rack with drawers

made of stainless steel, feature quick and easy access to all boxes.

Available:
- ST 12- 3 drawers,
- ST 16 - 4 drawers,

4 boxes per drawer.

Boxes

made of polypropylene or cardboard (dimensions 133x133x50mm), each box suits 81 test-tubes of Ø 12,5mm.

CO_2 back up system

enables the freezer controller to dose CO_2 in case of undesired temperature increase in the chamber. It is supplied with an internal battery. This solution is particularly useful in the event of a power outage.

model	compartments	racks per compartment (option)	boxes per rack (option)	rack set (option)	boxes per compartment (option)	boxes per unit (option)	test-tubes per unit* (option)
ZLN-UT 200 VIP	2	8	12	16 x ZLN-UT/ST12	96	192	15 552

ST 1200 P SMART

ST 6 CS SMART with glass door

ST 1/1/1 C SMART PRO

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- temperature range: +3...+40°C / +70°C (option) / +3...+70°C (SMART PRO)
- quality control protocol (at +37°C)
- English instruction manual
- temperature protection class 1.0 to DIN 12880 for C (comfort) version, class 2.0 for P (premium) version
- open door alarm
- castors for ST 1200 and 1450
- LAN and USB ports
- internal LED lighting
- height adjustable feet
- access port (Ø30 mm) with silicone plug on the left wall
- door lock
- stainless steel wire shelves (INOX)
- solid door
- main power switch flush with housing prevents unintentional switch off
- anchoring kit for ST 500, 700, 1200, 1450 and double/triple chamber unit
- automatic defrosting function for ST 500, ST 700, ST 1200, ST 1450

EXTRA FOR **SMART PRO**

- Wi-Fi
- LAN cable
- LabDesk
- fan speed control in the range 50...100% for ST 1-6 (optional for SMART)
- temperature protection class 3.3 to DIN 12880

AVAILABLE **VERSIONS**

- SMART
- SMART PRO
- FOT photoperiod (see page 18)
- FIT phytotron (see pages 19-22)
- TR tropic (on request) for higher ambient temperatures
- double/triple chamber units combined with ZLN 85 or CHL

SOFTWARE

- LabDesk for data download to a PC via LAN or Wi-Fi (optional for SMART version)
- LabDesk Cloud platform for remote data monitoring

Drying ovens

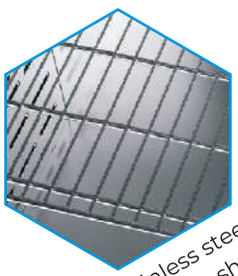
are designed to provide
high temperatures up to 300°C

SMART/SMART PRO controller with USB port

access port

air-flap (at the back)

Drying oven SLW 1000 IG SMART PRO with door with viewing window (option)



stainless steel wire shelf

handle with door lock

door with viewing window (option)

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

MAIN STANDARD **BENEFITS**

- temperature range: 5°C above ambient temperature...+300°C
- quality control protocol (at +105°C)
- English instruction manual
- temperature protection class 2.0 to DIN 12880
- open door alarm
- fan speed control (SLW)
- castors for SL 400, 750, 1000
- air-flap
- air-flap control in range 0...100%
- LAN and USB ports
- height adjustable feet
- access port: Ø30 mm for models 53-1000 or Ø9 mm for models 15, 32 with silicone plug on the left wall
- door lock
- stainless steel wire shelves (INOX)
- solid door
- main power switch flush with housing prevents unintentional switch off

EXTRA FOR **SMART PRO**

- Wi-Fi
- LAN cable
- LabDesk
- temperature protection class 3.1 to DIN 12880

AVAILABLE **VERSIONS**

- SMART
- SMART PRO (not available for SL 15/32)
- SIMPLE (see page 74)
- with nitrogen blow (see page 70)
- reinforced

SOFTWARE

- LabDesk for data download to a PC via LAN or Wi-Fi (optional for SMART version)
- LabDesk Cloud platform for remote data monitoring

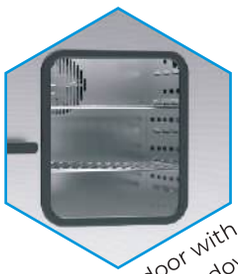
DRYING OVENS WITH NITROGEN BLOW

are laboratory ovens with dry nitrogen blow system of the chamber

SMART controller with USB port

access port (Ø30 mm)



door with viewing window (option)

shut-off solenoid valve for gas supply (option)

dry nitrogen blow system (at the back)

handle with door lock

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

The PN-ISO 589:2006 standard for the determination of total moisture in hard coal requires that samples of coal subject to oxidation be dried at a temperature of +105°C in a nitrogen flow drying oven.

Detailed requirements and specification of the oven have been described in point 6 of the norm. Use a “nitrogen flow drying oven, allowing to control the temperature in the range from +105°C to +110°C with additional possibility of blowing dry nitrogen stream, at a flow rate of about 15 dryer volumes per hour ”.

To meet these requirements, we have developed a special version of drying ovens that can operate strictly as per the above standard.

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- temperature range: 5°C above ambient temperature...+300°C
- quality control protocol (at +105°C)
- English instruction manual
- temperature protection class 2.0 to DIN 12880
- open door alarm
- fan speed control (SLWN)
- air-flap
- LAN and USB ports
- height adjustable feet
- access port: Ø30 mm for models 53-240 or Ø9 mm for models 15, 32 with silicone plug on the left wall
- door lock
- stainless steel wire shelves (INOX)
- solid door
- main power switch flush with housing prevents unintentional switch off

AVAILABLE **MODELS**

- **SLWN1** - laboratory oven with dry nitrogen blow system of the chamber; the kit includes connections, valves and a laboratory rotameter (which can be calibrated)
- **SLWN2** - laboratory oven with dry nitrogen blow system of the chamber; the kit includes connections, valves and a tech rotameter (which cannot be calibrated)

The nitrogen bottle is not supplied.

CALIBRATION

- **Calibration in air in 9 points** (corners + geometrical center) of the chamber at 1 selected by the customer temperature in accredited laboratory.
- **Calibration in nitrogen in 9 points** (corners + geometrical center) of the chamber at 1 selected by the customer temperature in accredited laboratory.
- **Calibration of laboratory rotameter** in accredited laboratory.

All calibrations are confirmed by 'Calibration Certificate'.

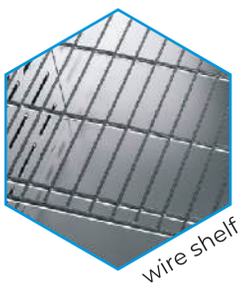
Sterilizer SRW 240 IG SMART

solid door

electromagnetic lock



wire shelf

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

MAIN STANDARD **BENEFITS**

- temperature range: 5°C above ambient temperature...+250°C
- quality control protocol (at +170°C)
- English instruction manual
- temperature protection class 2.0 to DIN 12880
- open door alarm
- fan speed control
- castors for SR 400, 750, 1000
- air-flap
- air-flap control in range 0...100% for user programs
- LAN and USB ports
- access port (Ø30 mm) with silicone plug on the left wall
- door lock
- height adjustable feet
- stainless steel wire shelves (INOX)
- solid door
- main power switch flush with housing prevents unintentional switch off

ADVANTAGES OF SR HOT-AIR STERILIZERS

- factory set sterilization programs
- automatic door lock during the sterilization program
- automatically closed air-flap after starting the sterilization program
- 5 user programs and 3 factory preset programs

AVAILABLE **VERSIONS**

- SMART
- Pass-through sterilizers

SOFTWARE (OPTIONAL)

- LabDesk for data download to a PC via LAN (option)
- LabDesk Cloud platform for remote data monitoring

wire shelf in
TERM version

ACCREDITED ISO/IEC 17025 CALIBRATION

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- temperature range: +35°C ... +42°C
- temperature regulation every 1°C
- visual and audible alarm in case set temperature is exceeded for 2°C
- independent temperature protection class 3.1 according to DIN 12880
- open door alarm
- LED display
- door lock
- height adjustable feets
- service settings protection against unauthorized use
- internal memory for data storage
- forced air convection
- polished stainless steel housing and stainless steel interior
- LED light
- external door with viewing window
- stainless steel telescopic drawers
- main power switch flush with housing prevents unintentional switch off

EXTRA FOR **CALDERA TERM**

- temperature range: +35°C ... +70°C
- stainless steel wire shelves

AVAILABLE **VERSIONS**

- CALDERA - warming chamber for fluids
- (with drawers)
- CALDERA TERM- warming chamber for blankets (with shelves)

CALDERA was designed according to PN-EN 60601-1-2:2002 EMC – Medical standard for electrical equipment (it does not interrupt work of the other medical instruments).

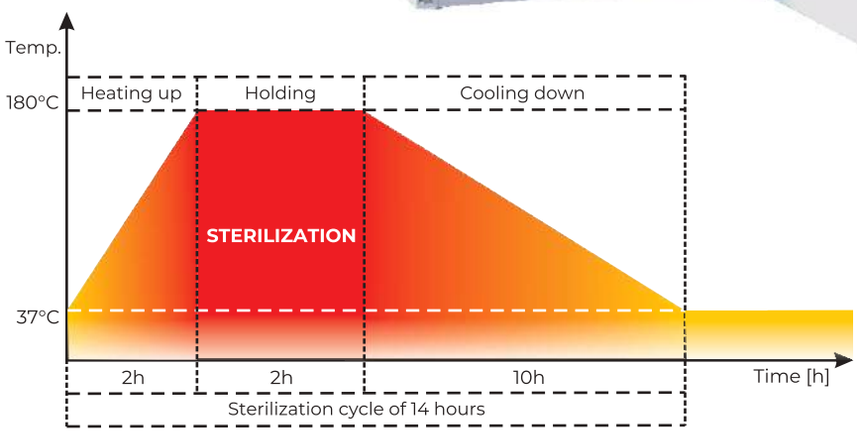
All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.



24 month warranty

CE

MAIN STANDARD **BENEFITS**

- temperature range: +5°C above ambient temp...+50°C
- quality control certificate (at +37°C, 5% CO_2)
- English instruction manual
- temperature protection class 3.1 to DIN 12880
- open door alarm
- LAN and USB ports
- height adjustable feets
- two access ports (Ø30 mm) on the left wall and on the rear, both secured with silicone plugs
- water pan to provide optimal humidity (passive humidyfing)
- door lock
- perforated shelves and rack for them to optimal shelf positioning
- silicone gaskets
- magnetic handle for ergonomic internal door opening
- CO_2 gas-mixing jet with Venturi effect to ensure quicker atmosphere mixing and more homogeneous distribution
- multiple temperature sensors for accurate measurement
- main power switch flush with housing prevents unintentional switch off
- Wi-Fi
- LAN cable

CONTAMINATION **PROTECTION**

- hot-air sterilization at 180°C for 2 hours
- fanless construction
- smooth, easy to clean stainless steel interior with rounded corners
- sterilizable, drift-free infrared CO_2 sensor
- inner glass door for sample viewing without changing the conditions in the chamber
- no hidden spaces

SOFTWARE

- LabDesk for data download to a PC via LAN or Wi-Fi
- LabDesk Cloud platform for remote data monitoring

All thermostatic equipment manufactured by POL-EKO® can be provided with Calibration Certificate issued by accredited Measurement Laboratory. Detailed information on accreditation is available on website: www.polekolab.pl and on page 161.

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- temperature range:
  - without humidity: 0...+70 (max 20°C below ambient temp.)
  - with humidity: +5...+70 (max 20°C below ambient temp.)
- Peltier element cooling system (see page 23)
- quality control protocol (at +25°C, 60%rH)
- English instruction manual
- temperature protection class 3.3 to DIN 12880
- open door alarm
- castors for KKP 750
- LAN and USB ports
- height adjustable feets
- access port (Ø30 mm) with silicone plug on the left wall
- door lock
- stainless steel wire shelves (INOX)
- double door (external solid, internal glass)
- external 6 L water tank (can be assembled on the left or right side of the unit)
- Wi-Fi
- LAN cable
- main power switch flush with housing prevents unintentional switch off

AVAILABLE **VERSIONS**

- SMART PRO
- KKP FIT with phytotron system (see pages 19-22)

SOFTWARE

- LabDesk for data download to a PC via LAN or Wi-Fi
- LabDesk Cloud platform for remote data monitoring

OPTIONS AND ACCESSORIES

Options and accessories
Features
Temperature protection

scan me

Internal glass door

This is standard equipment of CL/IL/KK and ILC models.
This is an additional option available for ST/CHL models.
Order number: */C (factory fitted).

External glass door

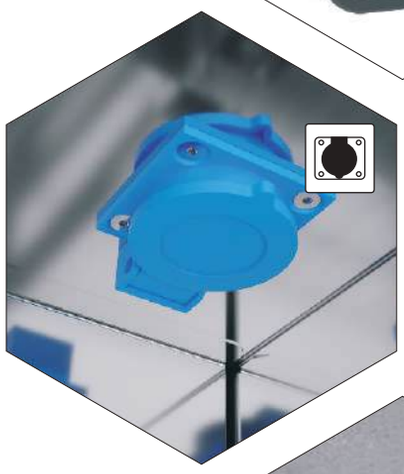
This is an additional option available for ST/CHL models
and for KK 350 and KKS 500, 700, 1200, 1450 models.
Order number: */A (factory fitted).
In case of ST models in SMATR PRO version,
maximum temperature is reduced to 40°C.

Door with viewing window

This is an additional option available for CL/IL/SL/SR models
(except CL/SL 15, 32) and for KK 115, 240, 400, 750 models.
Order number: */A (factory fitted).
In case of SL range, maximum temperature is reduced to
+250°C.

Internal socket

In this additional option we distinguish sockets with IP54 and IP66.
Sockets with grounding IP54: option available only for ST, CHL, ILW;
option NOT available for ZL, CL, SL, SR, KK, KKS, KKP, ILC,
on request: ILP.
Sockets with grounding IP66: option available only
for KK, KKS; option NOT available for ZL, CL, SL, SR, ILC;
option on request for ST, CHL, ILW, KKP, ILP
Order number: GNZ/* (factory fitted).
In case of power supply 115V 50-60Hz, units can be delivered with
the socket GNZ/B/IP54 (NEMA 5-15 U.S. 3 pin).
In case of internal socket, temperature range is limited to +70°C,
maximum permissible load of all sockets built into the unit
(max. 3 pcs) is 200 W. Different sockets available depending
on country and power supply.



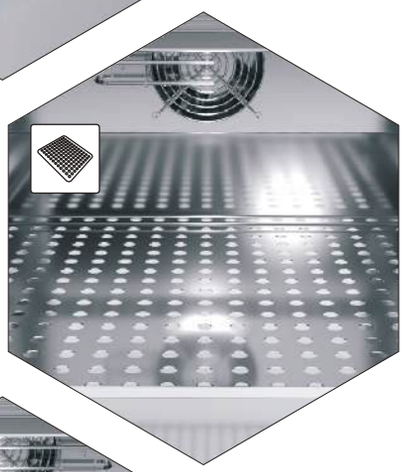
Plug

For the units with power supply 230V 50-60Hz,
standard plug: (type E/F) Uni-Schuko.
Other plugs: on request
The units with power supply 115V 50-60Hz
are delivered as standard with plug B.
Order number: PLG/* (factory fitted)
(not possible to choose other plug)

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

Interior lighting

This is standard equipment of ST/CHL models.
This is an additional option available for ZL/ILW/CL/SL/SR models (except CL/SL 15, 32).
Order number: OWW/OWW LED (factory fitted).
Interior lighting features one light point. The user switches it on with pressing the button located in the front panel.
This option does not allow day/night simulation (see FIT and FOT options). Max working temperature is reduced to +70°C, for SL/SR ranges to +250°C and for ZL-T range to -35°C.

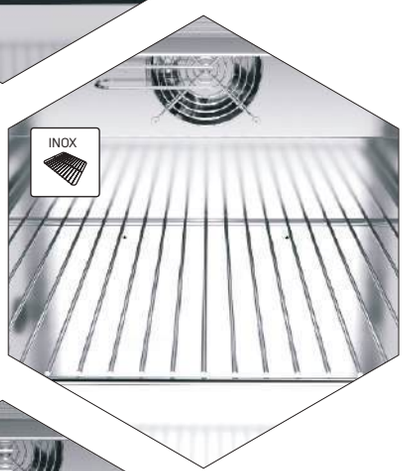


Perforated shelf

This is standard equipment in ZLW-T models.
This is an additional option available for ST/CHL/ZL/CL/IL/SL/SR/KK ranges.
Order number: */PP.
Perforated shelf is made of stainless steel to DIN 1.4301 and provided with slides.
Different depths of the shelf on request.

Full shelf with hole

This is standard equipment of ZLN-T models.
Order number: */PO.
Shelf is made of stainless steel to DIN 1.4301 and provided with slides.



Stainless steel wire shelf (INOX)

This is standard equipment of CL/IL/SL/SR/KK models, ZLN 85 model and in ST/CHL C (comfort) and P (premium) models.
Order number: */P INOX.
INOX wire shelf is made of stainless steel to DIN 1.4301 and provided with slides.

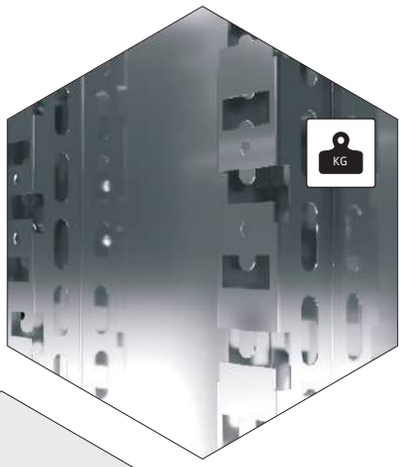
Reinforced shelf

This is standard equipment of CL/IL/SL/SR/KK 750 and 1000 models and all CL/ILW/SL models in the reinforced version **(order number: */W)**.
This is an additional option available for CL/ILW/SL/SR/ST/CHL/KK ranges and ZL-T models.
Order number: */PW.
Reinforced shelf can be wire, perforated or with a hole.
It is provided with slides.
Maximum shelf workloads and maximum unit workloads can be found in tables with parameters for certain product ranges.

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

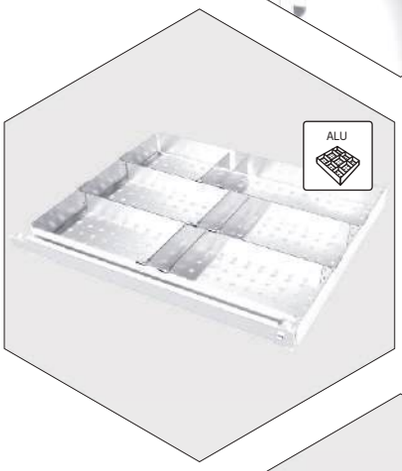
Reinforced version

This is a standard feature of CL/SL/SR 1000 models, and an additional option available for CL/ILW/SL and ZL-T 125, 200, 300 models.
Order number: */W (factory fitted).
Reinforced version of products allows to store heavy loads in chamber. It consists of reinforced construction of the chamber and reinforced shelves. In this way we prevent damage to the unit caused by heavy loads. Maximum shelf workloads and maximum unit workloads can be found in the tables with parameters for certain product ranges.
If a unit in reinforced version is purchased, the reinforced shelves are supplied instead of standard shelves.



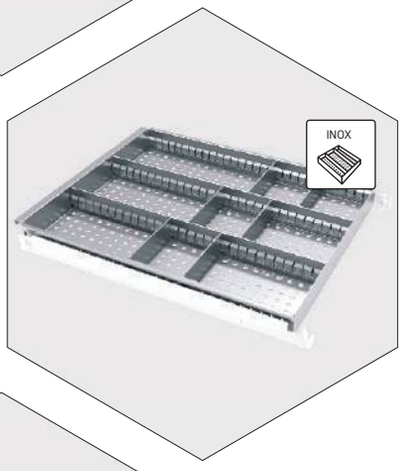
Aluminum drawer with powder coated slides

This is an additional option available for ST/CHL models.
Order number: ST/CHL SWP ALU.
The drawer is made of aluminum, 6 cm deep, provided with a pull out powder coated slides set, with 2 compartments longways + 2 across in each section.



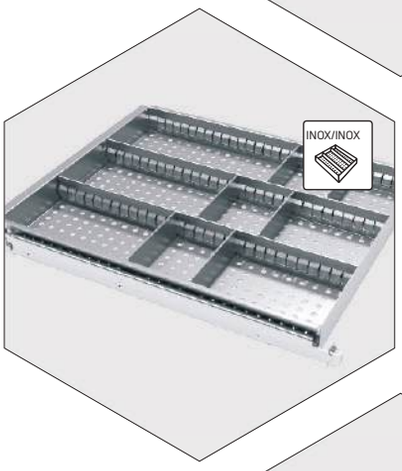
Stainless steel drawer with powder coated slides

This is an additional option available for ST/CHL models.
Order number: ST/CHL SWP INOX.
The drawer is made of stainless steel, 6 cm deep, provided with pull out powder coated slides set, with 2 compartments longways + 2 across in each section.



Stainless steel drawer with stainless steel slides

This is an additional option available for ST/CHL models.
Order number: ST/CHL SWPN INOX.
The drawer is made of stainless steel, 6 cm deep, provided with pull out stainless steel slides set, with 2 compartments longways+ 2 across in each section.



Stainless steel cuvettes

This is an additional option available for all products models.
Order number: KUW.GN */*
Stainless steel cuvettes can be placed on the shelves.
Different sizes available.

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

Photoperiodic system

This is an additional option for ST and ILW in SMART version
Order number: */FOT (factory fitted).
Photoperiodic system allows day and night simulation.
See page 18 for more details.

Phytotron system

This is an additional option for the KK/KKS/KKP range,
ILW SMART PRO version and ST 500-1450 SMART PRO models.
Order number: */FIT (factory fitted).
Phytotron LED system allows day and night simulation
with smooth illumination control (each 1%).
See pages 19-22 for more details.

FIT panels independent control

This is an additional option available for the units
equipped with FIT option – at least two (2) over-shelf
illumination panels. Possibility of independent
over-shelf lighting control.
Order number: FIT/R3 (factory fitted).
It allows to control the light intensity independently
for each of two or three over-shelf panels (e.g. the light
intensity above one of the shelves can be set to 100%,
and above the other to 50%).

Additional Pt 100 temp. sensor

This is an additional option available only for SMART PRO
versions (except for KK/KKS and units equipped with automatic
defrosting function PLUS or FOT/FIT option).
Order number: Pt 100 (factory fitted).
This option consists of an additional temperature sensor and
a sensor's socket. The additional temperature values can be
shown on the display. The user can set the main and additional
sensor. This way unit can work according to the sample
temperature in which additional Pt 100 sensor is placed.
The sensor may be supplied with a calibration certificate.

Castors

This is a standard equipment of ST/CHL 1200, 1450,
CL/SL/SR 400, 750, 1000, ILW/ILP 750, ILW 400, KK, ZLN-UT,
ZL-T except for ZLN 85.
This is an additional option available for all product ranges.
Order number: QLK*(factory fitted).
Large size units have been equipped with castors as standard.
For other units castors can be fitted on request.

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

Container for deionized water

This is standard equipment of KK range (except KKS).
This is an additional option available for KK range.
Order number: KK/Z.
This plastic container is for deionized water which is indispensible for a proper KK performance.
The container is not necessary in case the chamber is plugged directly to a deionizer.

HEPA-fresh air filter

This is an additional option available for CL/SL/SR models.
Order number: HEPA (factory fitted).
HEPA filter is installed at the air inlet to the chamber.

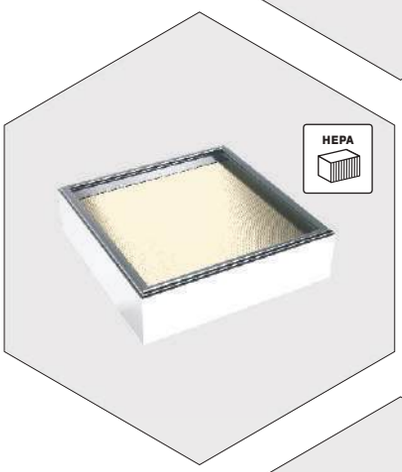


Table on castors

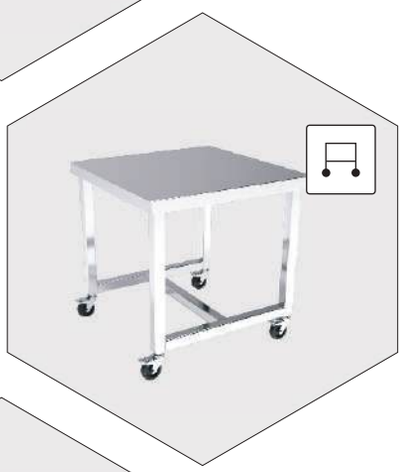
This is an additional option available for ST/CHL 1-3, ZLN 85, CL/SL 15, 32, CL/IL/SL/SR 53-240 models.
Order number: */S (powder painted) or ***/S INOX** (stainless steel).
Table with castors provides the highest comfort of using POL-EKO® products. We offer a wide range of tables equipped with castors.
Different sizes of the tables are available on request.

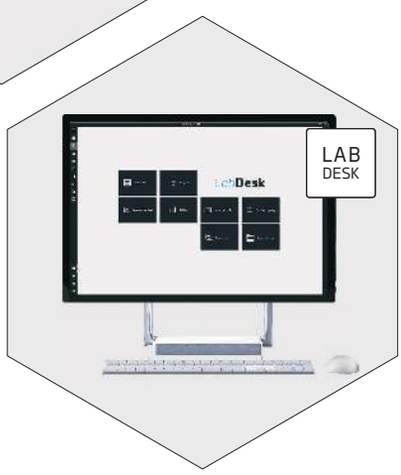


Base on castors

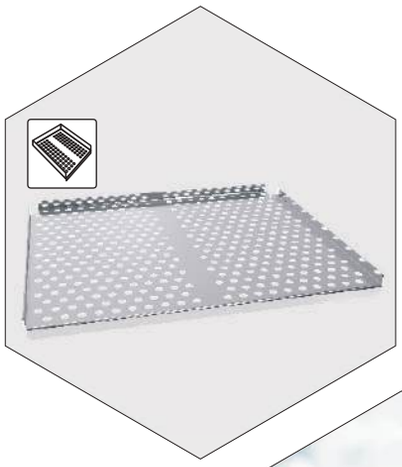
This is an additional option for ST/CHL 1, 2, 3, ZLN 85, CL/IL/SL/SR 53-240, KKP 240 models.
Order number: */ST, */ST INOX.

LabDesk software

This is a standard software for all SMART PRO units.
This is an additional option for SMART units.
Order number: LabDesk.
See page 24 for more details.



*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.



Reinforced perforated shelf

This is an additional option available for ILC range.
Order number: */PPW

RFID LOCK

This is an additional option for equipment in SMART and SMART PRO version (except ILC, ZL-T, ZLN-UT series).
Order number: RFID LOCK (SMART) (factory fitted).
The electromagnetic lock with RFID cards for SMART - allows access to the interior of the unit (opening the door) only after tapping the RFID card/fob to the reader or using key. The option contains electromagnetic lock, RFID reader, 5 cards (increased number of cards for request).
For ST/CHL/KK 1200 and 1450 option on request.
Order number: RFID LOCK (SMART PRO) (factory fitted).
The electromagnetic with RFID cards for SMART PRO - allows to log in to the SMART PRO controller and open doors by tapping the RFID card to the reader. The option contains electromagnetic lock, RFID reader/fob, 5 cards (increasing number of users on request).
For ST/CHL/KK 1200 and 1450 option on request.

CO_2 back up system

This is an additional option available for ZLN-UT models.
Order number: ZLN-UT/CO2 (factory fitted).
Enables the freezer controller to dose CO_2 in case of undesired temperature increase in the chamber. It is supplied with an internal battery. This solution is particularly recommended in the event of a power outage.

ZLN-UT/ST rack with drawers

This is an additional option available for ZLN-UT range.
Order numbers: ZLN-UT/ST12, ZLN-UT/ST16
Sturdy and heavy duty, made of stainless steel; feature quick and easy access to all boxes; 3 or 4 drawers (each for 4 boxes) per rack.

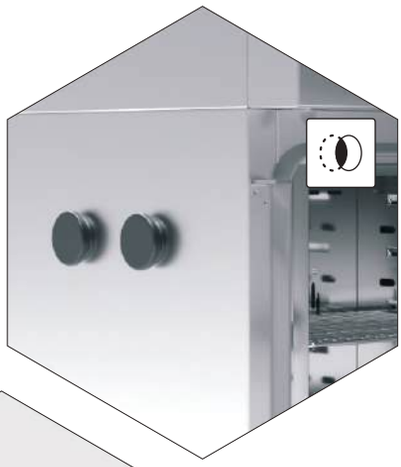
Boxes

This is an additional option available for ZLN-UT range.
Order number: ZLN-UT/STP12 ZLN-UT/STP16
Boxes set (12 or 16) made of polypropylene (dimensions 133x133x50 mm; each box suits 81 test-tubes of Ø 12,5mm) or made of cardboard.

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

Non-standard access port

This is an additional option available for all product ranges.
Order number: OCZ/20, OCZ/30, OCZ/60, OCZ/100 (factory fitted).
The access port is made in addition to the standard one.
Available diameters: 20 mm, 30 mm, 60 mm, 100 mm.
The diameter of the access port and its location must be agreed with the manufacturer before placing an order.

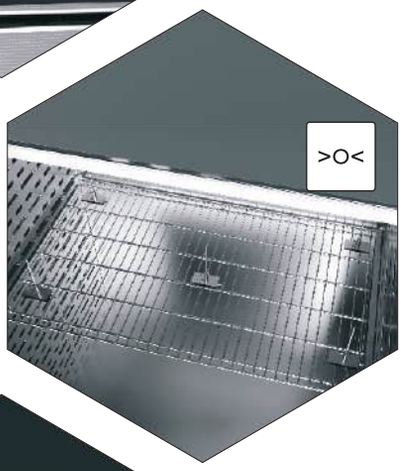


Low temperature version

This is an additional option available for ILW range and for KKS 500/700/1200/1450 .
Order number: */T (factory fitted).
It extends temperature range down to -10°C (standard temperature range starts from 0°C).

Calibration of the chamber

This is an additional option available for all product ranges.
Order numbers: BRT/9/L, BRT/1P/L, BRT/2P/L, IQ, OQ, PQ.
Measurements are performed at 9 points of the chamber (corners + geometric center) or at 5 points on the shelf (corners + geometric center) at the temperature selected by the User. Moreover, IQ, OQ, PQ documentation is available for each unit.



Alarm port - dry contact alarm

This is an additional option available for all product ranges (except SL SIMPLE and CALDERA).
Order number: PORT ALARM (factory fitted)
A potential free alarm port intended to inform on units state. It can be connected to any external monitoring system/unit with digital/binary input. The alarm port is a relay type output with NC-COM-NO contacts. They are switched when an alarm occurs or there is a power outage.
Active output: correct operation, inactive output: alarm

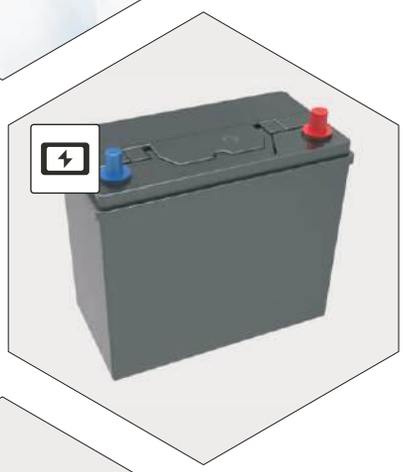
Extended temperature range ST/70

This is a standard feature of ST SMART PRO models.
This is an additional option available for ST models with solid door.
Order number: ST/70 (factory fitted).
This is an extended temperature range up to +70°C (standard temperature range in ST models is +3°C...+40°C).

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

Automatic defrosting function

This is a standard feature for KK, ST/ILW models with FOT and FIT illumination and CHL/ST M (monoblock).
This is an additional option available for ST/CHL/ILW models.
Order number: * PLUS (factory fitted).
The automatic defrosting function is performed while the unit is running. Used technology causes only a slight increase in temperature in the chamber (slight peak). Default settings - 2 minutes defrosting every 2 hours, causes a temporary increase in temperature in the chamber by approx. 3°C. Defrosting parameters can be changed by the User depending on the application - test type (wet / dry), door opening frequency, etc.

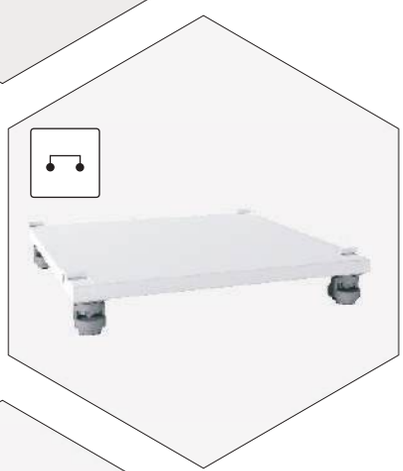


Display battery backup 12h

This is a standard feature for ZLN-UT range.
This is an additional option available for all product ranges (except SL SIMPLE and CALDERA).
Order number: BPP 12 (factory fitted).
Battery backup for display up to 12 h (only data registration, no parameters control).

Low water level sensor

This is an additional option available for KK range (except KKS).
Order number: KK/CP (factory fitted).
An alarm goes off when the water level is low.
Deionized water level sensor installed next to water container.
Alarm diode located on the control panel informing about refilling.



Base on castors

This is an additional option for ILC.
Order number: */STN
Base on castors for ILC, height 118 mm, powder coated.

Stacking adaptor

This is an additional option for ILC.
Order number: */AD
Stacking adaptor for ILC, height 90 mm, powder coated.

*all images are only for visual purposes and the real appearance of accessories may differ from the pictures presented.

Administrator function

This is a standard feature for all units in SMART PRO version. It allows to manage user accounts and supports GLP.

Audible alarm

This function activates an audible alarm at a time specified by the user.

Defrosting function

This is a standard feature for CHL models without automatic defrosting function. Defrosting is performed automatically but it has to be launched manually by the user at the most suitable time (e.g. when there are no samples in the chamber). Defrosting involves temporary heating inside the chamber by approx. 20-30°C. Therefore it can't be implemented during its operation (to not to disturb temperature fluctuation).

Door lock

All the units (except SL SIMPLE) are equipped with the door lock.

E-mail reports

This is a standard feature of all units in SMART PRO version. This feature involves sending e-mail messages (up to 3 addresses) in the event of alarms, events in the program or events related to editing users. The function can be configured according to individual requirements. The condition for sending the message is connection to the Ethernet network.

Ethernet connection and remote control via Internet

This is a standard feature for SMART and SMART PRO models. Each unit can be connected to the Ethernet network or directly to the computer with a LAN cable (optional for SMART and standard for SMART PRO). LabDesk software (optional for SMART and standard for SMART PRO) is needed to read data (saved data and event log). With this feature, the unit can be controlled and monitored via Internet. It is also possible to connect several units at the same time and control them from one computer.

Fan speed control

This is a standard feature for SL/CL/ILW/KK SMART, SMART PRO and ST/CHL 1-6 SMART PRO. It allows control the fan speed in the range 0/10/50 ... 100% (depending on the model). Different fan speed can be set for each program separately.

Measurement data memory

All the units (except SL SIMPLE) are equipped with the measurement data memory function as standard. It allows you to store 10,000 measurement results which are stored in the memory of SMART units for 6 months, and in SMART PRO for 12 months. You can download them to USB flash drive or transfer them to your computer at any time. The data can be opened in LabDesk or MS Excel.

Open door alarm

All units (except SL SIMPLE) are equipped with an open door alarm. Upon opening the door the alarm goes off (sound alarm and message appears on the display) according to the set by the user alarm delay.

Over/under temperature (and humidity in KK/KKP/KKS) alarm

In the menu, you can set the permissible value of exceeding the set temperature (and humidity in KK/KKP/KKS). If the temperature or humidity in the chamber rises beyond the acceptable limit, an audible alarm will sound and the ALARM icon will appear on the display.

Parameters priority

Equipment which features parameters priority works according to the following rule: the unit achieves set parameter first (temperature, humidity) and then starts time countdown. In this case the set parameter is more important than duration.

Power failure control

A temporary power failure during program operation would be unnoticeable to the user, as the program continues after power is restored. Therefore, if a power failure occurs while a program is running, a message appears on the display. The information also appears in the event log.

Schedules

It's possible to schedule programs for all units in SMART PRO version. This feature allows create a list of programs to be run at the set time. Several different schedules can be created.

Standard access port for external sensor

All the units are equipped with a standard access port. It is placed in the left side of the chamber (in case of SL SIMPLE – in the right). Access port which has been secured with a silicone plug can be used to insert an external temperature sensor.

Temperature (and humidity in KK/KKS/KKP) calibration

Each equipment is calibrated by the manufacturer in accordance with applicable standards. The temperature displayed corresponds with high accuracy to the temperature in the geometric center of the chamber. User calibration is not necessary for the correct operation of the unit. However, the user has the option of calibrating the chamber (SMART and SMART PRO) on his own responsibility and must be aware of the consequences of changing the factory parameters of the equipment. If the unit has been calibrated, the calibration certificate becomes invalid after the new correction is made.

Temperature (and humidity in KK/KKS/KKP) sensor fail alarm

When the temperature (and/or humidity in KK/KKP/KKS) sensor does not work properly, the display shows information about the error.

Time priority

Equipment operating with time priority operates according to the following principle: the unit simultaneously starts counting the time and the process of achieving the set parameters. Time is the main parameter in this case.

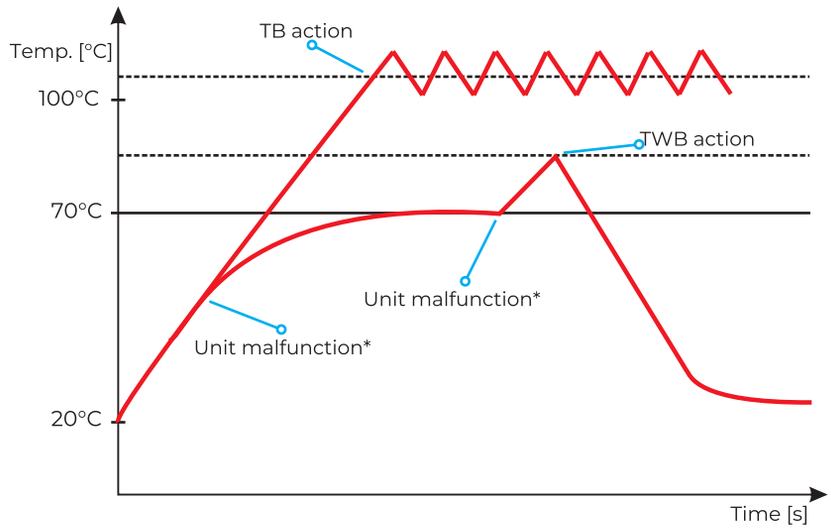
USB port

All the units (except SL SIMPLE and CALDERA) are equipped with a USB port. It ´s used to transfer data from the internal memory of the unit to the flash memory. The data saved in the *.csv file can be opened in Notepad. Data saved as *.plkx can be opened in LabDesk.

Wi-Fi communication

Equipment with SMART PRO controllers are equipped with a Wi-Fi communication module. It enables wireless communication and data transfer to LabDesk software.

Over temperature protection class 1.0 and class 2.0 according to DIN 12880



Temperature protection class 1.0 (TB)
factory set at 10°C above
the max temperature

Over temperature protection class 2.0 (TWB)
- programmable

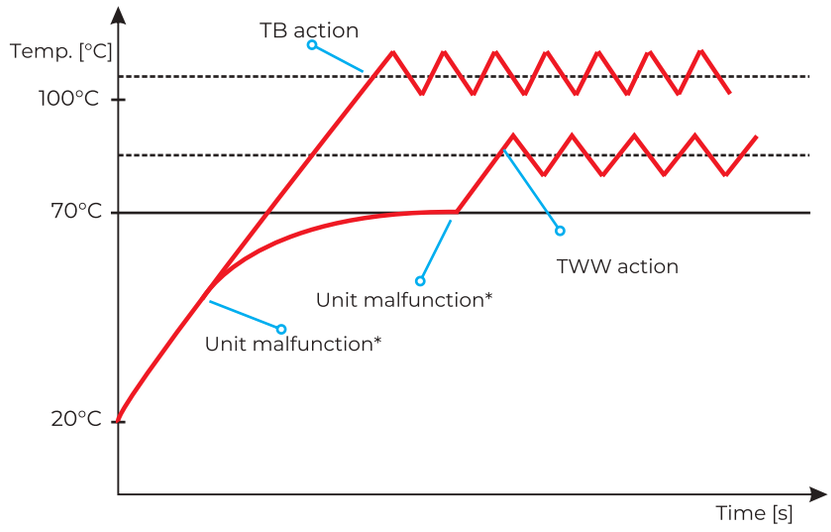
set temperature

* temperature sensor, measuring circuit, program failure, unintentional change of set parameters

Over temperature protection class. 1.0 to DIN 12880 is a standard function for the ST/CHL/CL/IL/SL/SR/KK/CALDERA and SIMPLE equipment. It is factory set at approx. 10°C above the max temperature. Over temperature protection class 2.0 to DIN 12880 is a standard function for the CL/IL/SL/SR equipment in the Smart version.
It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the heaters. To resume operation, the user has to switch the unit off and turn it on again

DIN 3.1

Over temperature protection class 3.1 according to DIN 12880



Temperature protection class 1.0 (TB)
factory set at 10°C above
the max temperature

Over temperature protection class 3.1 (TWW)
- programmable

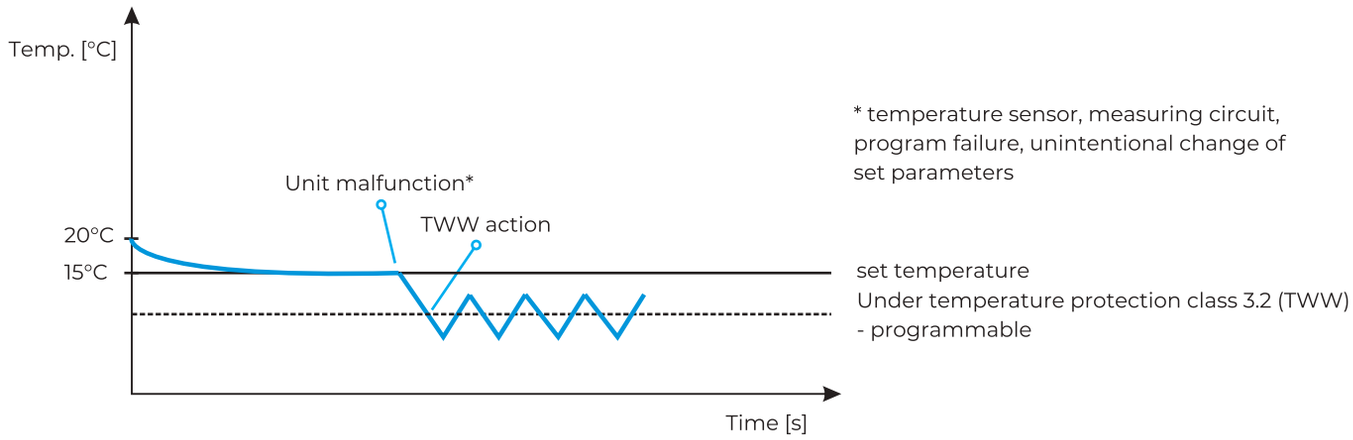
set temperature

* temperature sensor, measuring circuit, program failure, unintentional change of set parameters

Over temperature protection class 3.1 to DIN 12880 is a standard function for the CL/SL and CALDERA equipment in the Smart PRO version, and optional for the CL/SL/SR ranges in the Smart version.
Order number: */3.1 (factory fitted).
It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the heaters. When the temperature falls down below the set limit, the unit will resume operation automatically.

DIN 3.2

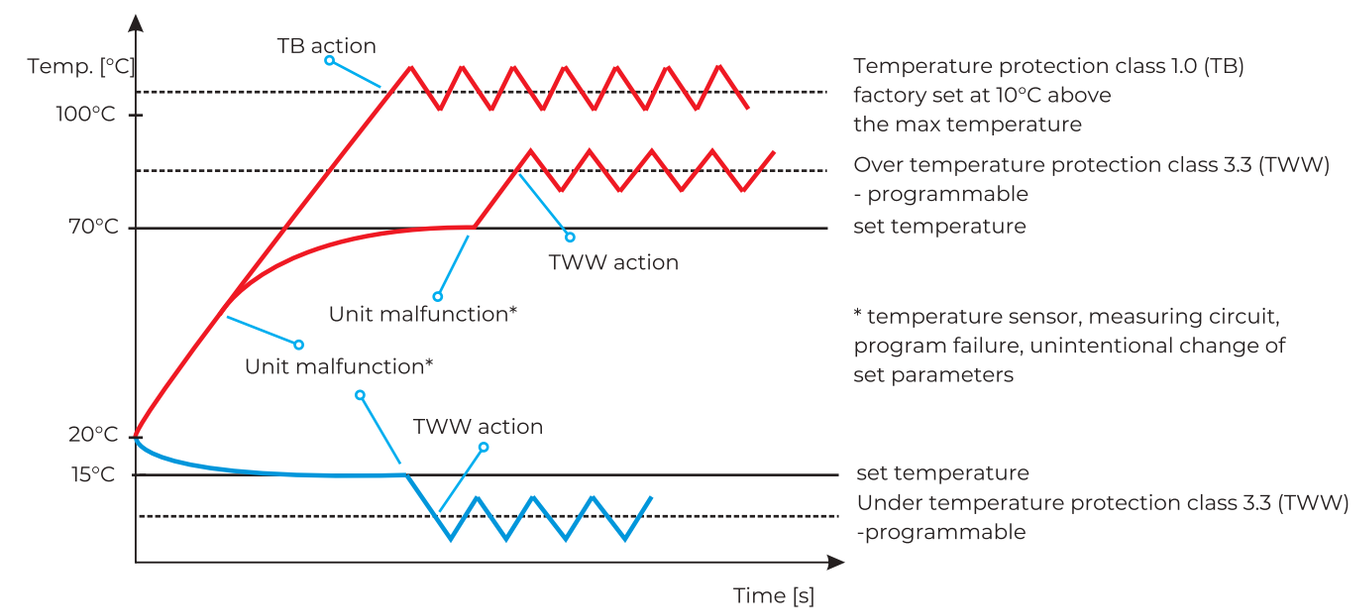
Under temperature protection class 3.2 according to DIN 12880



Under temperature protection class 3.2 to DIN 12880 is a standard function for CHL Smart PRO version and optional for CHL in Smart version.
Order number: */3.2 (factory fitted).
It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the compressor. When the temperature goes above the set limit, the unit will resume operation automatically.

DIN 3.3

Over/under temperature protection class 3.3 according to DIN 12880



Over/under temperature protection class 3.3 to DIN 12880 is a standard function for the KK, ST and IL in the Smart PRO version.
It is an additional option for ST and IL in the Smart version.
Order number: */3.3 (factory fitted).
It features a sample protection function: the user can set the over/under protection temperature and once it has been exceeded, the program will cut off the heaters or the compressor. When the temperature goes back to the permitted range, the unit will resume operation automatically.

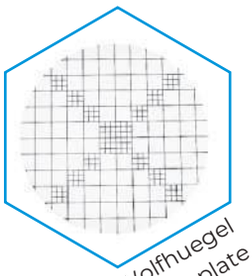
COLONY COUNTER LKB 2002

A colony counter is a device helpful in a microbiological laboratory that allows for easy, quick and accurate counting of bacteria on Petri dishes.

magnifier optical power 3,25 diopters



Wolfhuegel scale plate

Colony Counter LKB 2002

standard marker

counting glass plate

ZM external counting marker (option)

cartridge for ZM marker (option)

LKB 2002

MAIN STANDARD **BENEFITS**

- automatic weight compensation of Petri dishes
- anti-shock counting technology
- ringlight technology enables even illumination of the counting field
- bright or dark background selection
- mean value calculation function
- standard marker included
- Petri dishes adapters (diameter < 120 mm) - 3 pcs
- removable Wolfhuegel counting plate
- adjustable push force
- sound and visual counting control
- adjustable position of the magnifying glass
- magnifier optical power 3.25 diopters

24 month warranty

CE

LABORATORY SHAKER WITH COOLED INCUBATOR

Each POL-EKO® orbital laboratory shaker allows mixing substances under strictly defined thermal conditions. This is possible by placing the unit in ILW laboratory incubator.

Depending on the size, the LS shaker is placed in the incubator, which can also be equipped with internal power sockets and FIT/FOT option (necessary for, e.g., algae cultivation).

It is also worth mentioning that both the incubator and the shaker are programmable units and this basic and essential function allows users to set shaking parameters as well as temperature and light in the incubator, increasing flexibility in performing laboratory work.

ILW 400 IG SMART PRO with LS 700 and PL.1

Universal platform

Universal platform for various kinds of vessels with 4 roller clamps (without anti-skid mat).
Order number: LS XXX/PL XX.1

Platform for fixing flasks holders

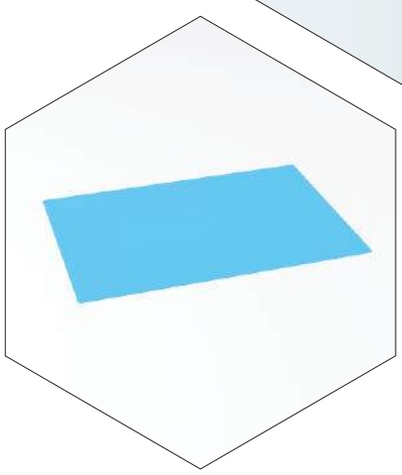
Platform for fixing flasks handles, suitable for flasks of the following capacities: 25ml, 50ml, 100ml, 250ml, 500ml, 2000ml, the handles shall be ordered separately.
Order number: LS XXX/PL XX.2

Platform for Petri dishes shaking

Platform for shaking Petri dishes, bacteria culture flasks and other vessels of low centre of gravity.
Order number: LS XXX/PL XX.3

Platform for separatory funnels

Platform for separatory funnels with 3 roller clamps for shaking, salting out, extraction and concentration.
Order number: LS XXX/PL XX.4



Anti-skid mat

Anti-skid mat for LS laboratory shakers.
Order number: LS XXX/PL XX

CERTIFICATE

The CompactLine DCL Fume Hoods, available in models 1200, 1500, and 1800, have beencertified by TÜV, demonstrating full compliance with essential European standards: PN-EN 14175-1:2003, PN-EN 14175-2:2003, and PN-EN 14175-3:2019.

This certification highlights our commitment to providing laboratory professionals with equipment that meets the highest safety and performance benchmarks. Each model has undergone rigorous testing to ensure optimal containment of hazardous vapors, consistent and reliable airflow, and superior protection for laboratory personnel and environments.

Designed to meet the diverse needs of modern laboratories, these fume hoods combine uncompromising safety and functionality while offering flexibility in various configurations. The TÜV certification serves as a testament to our dedication to quality, providing laboratory managers and researchers with dependable and efficient performance.

DCL FUME HOODS **CONTROLLERS**

iCM 500 F

- microprocessor controller for regulation and monitoring of fume hood face velocity [m/s]
- visual and sound alarm in case of emergency
- control panel with fully graphic and numerical LC-display
- throttle with high-speed actuator
- VAV (Variable Air Velocity)

iCM 500 FP

- microprocessor controller for regulation and monitoring of face volumetric air flow rate [m³/h]
- visual and sound alarm in case of emergency
- control panel with fully graphic and numerical LC-display
- works with Building Management System (BMS)
- VAV (Variable Air Velocity)

FM 550

- control functions with visual and sound alarms in case of low air flow (in accordance with PN-EN 14175)
- sash window height alarm
- airflow measurement [m³/h]
- fume hood illumination control

Automatic Sash Controller SC 500

Infrared light barrier transmitter/receiver for registering objects during the closing proces. Foot switch for opening the sash (option).

DIMENSIONS & DATA

All dimensions refer to standard units
(without optional accessories).

		Tabletop DCL 8.00	Tabletop DCL 12.00	Tabletop DCL 15.00

fume hood main switch

stainless steel scaffold (option)

DCL WALK-IN

Walk-in DCL 1500 with scaffolding

Walk-in DCL 1800 with scaffolding

Walk-in DCL 1200 with scaffolding

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- 2x 230V 50-60Hz electrical sockets type F (Schuko)
- LED illumination of the working chamber
- air-flow sensor (Schneider FM 550-A-0-E)
- window, opening upwards at 500 mm height (max 1850 mm)
- system preventing uncontrolled window falling
- main switch with safety button

AVAILABLE **VERSIONS**

- Walk-in DCL 1200
- Walk-in DCL 1500
- Walk-in DCL 1800

OPTIONAL **EQUIPMENT**

- 230V or 400V sockets and different plugs, on request
- fittings for distilled water, LPG and special gases (coloured according to EN 13782)
- automatic window
- explosion-proof equipment (illumination)
- scaffolding on the back wall made of stainless steel
- elements of the fume hood made of stainless steel according to DIN 1.4404
- (construction, internal chamber, worktop, housing)
- air flow controller iCM 550 F or iCM 550 FP (see page 146)

WORKING CHAMBER **FINISHING**

SS VARIANT

worktop – solid ceramics th. 27 - 33 mm,
with marine edge, ceramic sink (dims 280 x 80 mm)
is mounted under the worktop, internal chamber side walls
made of steel, covered with chemically resistant epoxy paint.

CR VARIANT

worktop – solid ceramics th. 27 - 33 mm,
with marine edge, ceramic sink (dims 280 x 80 mm)
is mounted under the worktop, internal chamber side walls
made of ceramic Buchtal.

PP VARIANT

worktop – solid ceramics th. 27 - 33 mm,
with marine edge, ceramic sink (dims 280 x 80 mm)
is mounted under the worktop, internal chamber side walls
made of polypropylene.

LM VARIANT

worktop – solid ceramics th. 27 - 33 mm,
with marine edge, ceramic sink (dims 280 x 80 mm)
is mounted under the worktop, internal chamber side walls
made of phenolic resin composite.

HF VARIANT

polycarbonate window glazing
worktop – polypropylene with marine edge,
polypropylene sink (dims 280 x 80 mm)
is mounted under the worktop, internal chamber side walls
made of polypropylene.

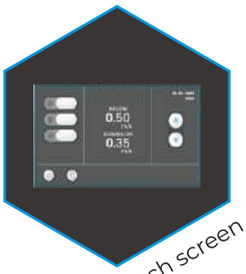
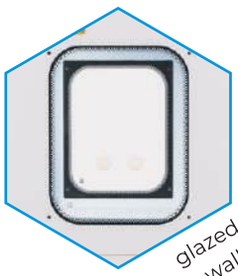
Compact Line Ductless fume hoods



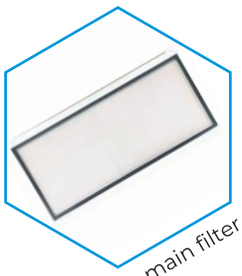
7" full touch screen

800 LUX eco-friendly LED light



glazed side walls

Compact Line fume hood DCL 1500 Ductless



1 x main filter

metal stand with adjustable wheels (option)

welded polypropylene structure with polypropylene built-in worktop

DCL DUCTLESS

DCL -1500 Ductless

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- space-saving design, a cost-effective benchtop model that fits perfectly in any lab
- durable construction, made from high chemical-resistant polypropylene with a built-in sealed worktop
- smart controls, features a 7” touchscreen with airflow display and alarm, ensuring safe operations
- eco-friendly LED light, equipped with 800 LUX LED lighting for energy efficiency
- versatile filters, supports a variety of HEPA and carbon filters to handle different chemical fumes
- enhanced safety, includes tempered glass side windows and a sliding front sash with a counterweight for easy access

OPTIONAL **EQUIPMENT**

- metal stand (with adjustable wheels)

AVAILABLE **VERSIONS**

- Ductless DCL 1500 / 1800
- Ductless DCL PRO 600 / 900 / 1200 / 1500 / 1800

Compact Line Ductless PRO fume hoods

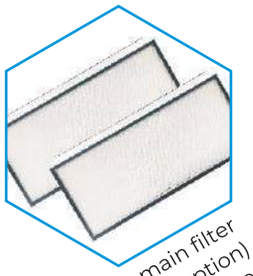
10.1" full touch screen (in standard)

VAV - Variable Air Volume controll (in standard)

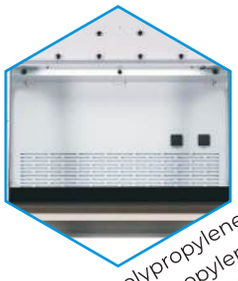
Compact Line fume hood DCL 1500 Ductless PRO

VOC counter, Volatile Organic Compound sensor (in standard)

chamber RED alert (in standard)



1 x main filter (2 x option) + 1 x pre filter



8 mm welded polypropylene structure with polypropylene built-in worktop

DCL 1500 Ductless PRO

24 month warranty

CE

MAIN STANDARD **BENEFITS**

- advanced monitoring, incorporates VAV with airflow alarm and VOC chemical sensors for real-time monitoring and alerts
- high-efficiency fan, features a quiet ECM fan with adjustable speeds to maintain optimal airflow
- superior illumination, comes with 800 LUX LED lighting, separated from the work area for enhanced safety
- enhanced access, provides convenient front access for filter replacement and supports a wide range of filters for comprehensive protection
- certifications, meets EN-14175 / CE / ASHRAE 110-1995 standards for safety and performance
- polypropylene worktop built into the fume hood as standard

OPTIONAL **EQUIPMENT**

- metal stand (with adjustable wheels)
- polypropylene base cabinet
- UV light
- gas tap
- water tap
- polypropylene cup sink
- polypropylene sink 30 x 40 cm
- electric socket 230V 50Hz
- XL version for 2 full-size main filters

AVAILABLE **VERSIONS**

- Ductless DCL 1500 / 1800
- Ductless DCL PRO 600 / 900 / 1200 / 1500 / 1800

CALIBRATION SERVICES

Comprehensive services for the supervision of measuring equipment

scan me

POL-EKO LAB

is accredited by the Polish Centre for Accreditation
(a member of ILAC) and provides accredited services

WE PROVIDE ACCREDITED CALIBRATION SERVICES OF:

- thermostatic and climatic chambers, in the temperature range: -80...+200°C
- climatic chambers in the range of relative humidity, in the temperature range: +10...+60°C for humidityi 20... 98%
- water baths and thermoreactors, in the temperature range: -25...+200°C
- lab furnaces, in the temperature range: +100...+1100°C
- chambers for steam sterilization (autoclaves), in the temperature range: +60...+140°C

After the service has been performed, the client receives a Calibration Certificate, in which the following information is presented: average temperature / humidity at each point, optional effect of the load, measurement uncertainty, temperature / humidity stability.

WE ALSO PROVIDE ACCREDITED CALIBRATION SERVICES FOR:

- electric and electronic thermometers and data loggers with an external sensor, in the temperature range: -80...+1100°C
- electric and electronic thermometers and data loggers with an internal sensor, in the temperature range: 0...+140°C
- thermohygrometer, method temperature range: +10...+60°C, in the relative humidity range: 20...98%

After the service has been performed, the client receives a Calibration Certificate, in which the following information is presented: average value of temperature / humidity, correction of temperature / humidity value, measurement uncertainty.

CALIBRATION OF LABORATORY SIEVES

- laboratory sieves, in the measuring range: 0,02... 125 mm

Detailed information about our services is available on the website of the Polish Centre for Accreditation under the accreditation number AP 115 www.pca.gov.pl and on our website www.polekolab.pl.

AP 115

NON-ACCREDITED SERVICES:

qualification procedures IQ, OQ, PQ
- thermostatic and climatic chambers
- autoclaves
- high temperature furnaces

temperature and humidity mapping in rooms and cars
- temperature range: -30 ... +70°C
- relative humidity range: 10 ... 90%
